Loxal's digital access control products enable clients to streamline entry to valuable sites, properties and facilities.

The entire range benefits from a feature rich cloud-based management system.

The efficient time saving products help clients reduce their carbon footprint.

End-to-end  
access control  
solution

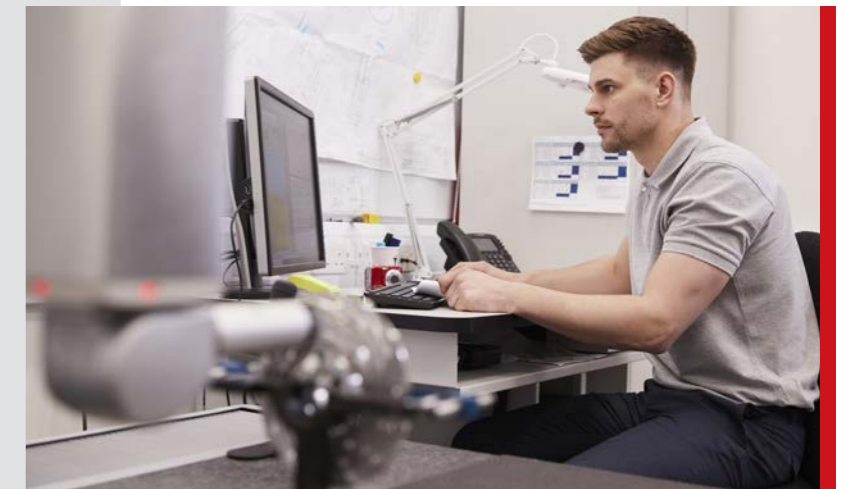

**DESIGNED AND  
MANUFACTURED  
IN THE UK**

**ABOUT US**

**DEDICATED TO FUTURE PROOFING ACCESS MANAGEMENT**

Loxal leads the market with the supply of its patented access control solutions. Products include digital entry key storage devices and locks. All products operate on the unique IDACS cloud-based management platform and app.

Loxal is a privately-owned family business with a strong pedigree in the security industry that dates back over forty years. David White, Loxal managing director, and security industry stalwart, previously founded both Sitex and VPS.

Creating solutions for client problems has led to the development of the IDACS (Intelligent Digital Access Control System) product portfolio. All of the robust products within the range operate from their own independent internal power supply, ideal for remote or mains free sites, in the harshest of environments. The entire range is wireless.

**WHAT WE DO**

IDACS has been incorporated into a bespoke cloud-based operating system, and client management platform. This platform coupled to the new Loxal app, allows for seamless online code management and audit data retrieval, in line with the latest technical advances. The platform gives customers direct access and control over valuable asset portfolios. IDACS fully integrates into the 'Resideo', 'Videofied' alarm system which is another major system benefit.

Loxal have created a versatile access solution, adaptable to virtually any site requirement. The entire range has all undergone and passed the rigorous 'Sold Secure' testing accreditation and earned a place on the official Police 'Secured by Design' register.

Loxal's new IDACS access solutions are fast becoming the industry standard in asset protection.

**QUICK FACTS about our products**

**Versatile**

# OUR PRODUCTS

ALL DIGITALLY CONTROLLED BY IDACS

**LOXAL MANUFACTURE AND SUPPLY A WIDE RANGE OF PATENTED DIGITAL LOCKS AND KEY STORAGE DEVICES INTEGRATED WITH REMOTE MANAGEMENT SOFTWARE GIVING YOU 24/7 CONTROL VIA OUR CLOUD-BASED PLATFORM.**

Lower key-holding and key related costs whilst providing compliance data and reducing carbon footprint

## RESIDEO VIDEOFIED ALARM INTEGRATION

Loxal's range of IDACS products are compatible with Resideo Videofied Alarm Systems. When paired, IDACS products are peripheral additions to the Resideo system and include polling, RF signal test, arm and disarm. We have created an external keypad for the system that means fobs, tags or tokens are no longer required.

### FACE FIX KEY SAFE

Versatile and secure on-site key storage  
Multiple Installation methods  
Keys held securely and conveniently on wire retractor

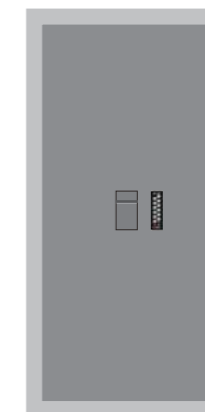

### S-TRAP KEY SAFE

All the benefits of our Face Fix key safe installed on a unique S-Trap fixing bracket  
The most convenient key safe on the market  
Fitted in seconds, with no tools required

Installed in under 5 minutes without tools, this device offers huge benefits for the Police, Enforcement Companies and Property managers

# STREAMLINE ACCESS

REDUCE COSTS AND INCREASE EFFICIENCY

## BASIC INSTALLATION AT A GLANCE

Once a Loxal IDACS product is installed the benefits soon become clear. Eliminate wasted man hours, waiting for keys, collecting keys, and associated key costs. Reduce your carbon footprint, increase compliance and productivity.

### 1 THE DESKTOP APP

- Add and activate units
- Clone units
- Add/delete users
- Create auditors
- Create user groups and accounts
- Generate temporary codes
- Delete codes
- View audits

### 2 DIGITAL ACCESS

- Group or temporary access codes issued to approved users via company administration, or by text and email
- Different codes are available depending on user access requirements
- Permanent or group codes are common across portfolios and sites
- Flexible and traceable one day or weekly codes to provide emergency access
- When access is no longer needed codes can be deleted

### 3

- All Loxal products have the same easily identifiable numeric electronic keypad. Enter the code using the electronic keypad to gain access to the secured site or building.

### 4 AUDIT TRAIL

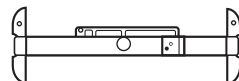

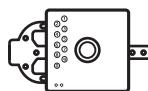

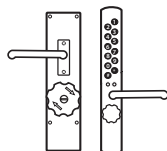

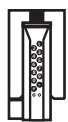

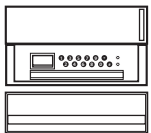

- Generate a wide range of data and reports which give you a full audit trail of access history.

### 5 VIDEOFIED ALARM INTEGRATION

- By using IDACS to control your onsite alarms you are increasing security and reducing administration.
- Even temporary code holders have control of alarms meaning you do not need to issue sensitive alarm codes or issue fobs or tokens.
- Videofied alarm systems integration (Optional).
