

# The Letterbox Key Safe

Perfect for holiday homes and lets

The new Loxal letterbox key safe is the ideal solution for discrete, at property key management and access control. The letterbox key safe can replace the existing door letter flap and is installed without damage by a unique clamping mechanism. The original letterbox can easily be reinstated after use.

The key safe is installed with IDACS (Intelligent Digital Access Control System) and facilitates numerous code functions such as permanent, weekly or daily codes.

When guests leave simply issue a new code to the next guests. IDACS also records a full audit trail of key safe activity.

All of the common and costly problems associated with key management are eliminated, including having to meet guests on site, lost keys, looking for keys, waiting for keys or arrivals and having to re cut keys. Optional access for post or it can be completely sealed.

The letterbox key safe allows homeowners to further enhance the service provided for the guest as well as improving their own efficiency. A small investment to further protect valuable holiday property. Tested and accredited by the Police Association 'Secured by design'.
