

FACE FIX KEY SAFE

TECHNICAL SPECIFICATIONS

Description

The IDACS™ FFKS is a robust, wireless, intelligent cloud-based digital key safe. The unit retains a full audit trail, external power up facility and police approved key retention.

Security/Features

Online cloud-based code management system (IDACS)
Loxal App
7 digit codes with ten million differences
Permanent and temporary user codes
Group coding
Store keys and access cards
Comprehensive audit trail
Stand alone power with up to 6 years battery life*
External power up
Audible keys
Led Light for Key Press, code acceptance and Videofied alarm
Pairing*
Audible low power warning
1.5 meter retractor cable for key retention
Secured by Design (Police Accredited)
*Compatible with any Resideo Videofied System
Multiple installation methods

Battery and performance

Power (IDACS) 4 x Alkaline. 1.5 AA Cell
Battery Life *Up to 6 years dependent on use. Each use will reduce this by approx. 8 hours (eg 1000 uses over 5 years, 6000 uses over 1 year) Battery reduction can be monitored on the App.
• Whilst unlocking it draws 950mA for about 0.5 second
• Whilst it is in sleep mode it draws 40uA
• When a key is pressed the draw is 1mA for about .5 second
• During start up it draws 16mA for about 30 seconds
During data transfer it draws 16mA
Operating Temperature -15 to 50C
Material Folded Steel
Colour Black Powder coated/RAL Colourways available by special order
Lock Type Solenoid:Micro Switch
Dimensions W75mm L250mm D55mm L330mm when opened
Weight 1.8 kg
Internal Drawer L110mm W55mm D20mm

Installation Mounting*

The BFFKS can be installed in a number of ways.
Using the bespoke bracket to install to a solid substrate with size 4.5/5 fixing screws.
Minimum 3 Maximum 5
Coach bolt through door or any surface where access to from the rear is available.
S-Trap to hang on hinge side of door.
*Please contact supplier for more information and installation guide

Local Bluetooth Connectivity

The Loxal App acts as data transfer between the cloud and the device using a secure localised Bluetooth connection. Data transfer includes new permanent code user additions, codes deleted and audit. At this point the App will check device battery level and time.

IDACS Overview

Software
IDACS is a secure, scalable, fully supported cloud based custom software solution to enable users of Loxal products to administer and manage their owned or rented units.
The app is accessible via a web browser.
The App is built and hosted on Microsoft Azure App Services
Secure - encrypted code
Scalable - future proof
Customized to meet industry standards
Fully supported and adaptable
Compatible with Office 365
MICROSOFT AZURE HOSTING & APP SERVICES
The system is operated via our online cloud-based (Azure) client portal and app. Once accounts have been activated our clients have complete control of their Loxal IDACS assets.

A full and comprehensive portal user guide is available separately.

IDACS code protocol is as follows.

IDACS Uses 7 digit codes which create 10 million code differences.

We can split code allocation with a suggested maximum of 2500 codes

These can be predetermined upon account allocation and set up, ie, 1000 permanent codes, 500 daily, 500 weekly codes, 500 fixed etc. All Daily and weekly codes self-delete after timeframe.

Units can be cloned if required so that the temporary codes are identical on the chosen units. Codes are identifiable to whom they are issued.

Pairing and operation-Resideo Videofied Alarms Only

As an optional add-on we can install our fully integrated Videofied module. Once paired the BFFKS then becomes the outdoor keypad for the Videofied system. From the BFFKS you can turn on and off the alarm, test RF range, create tamper and signal failure alerts. Pairing an IDACS product follows the same procedures as pairing any other Videofied device.

Follow the menu through Configuration/Areas and Devices/ Devices/Add a New Device and when prompted to 'Push Button on Device' you instead enter *#36 to install arm/disarm and *#37 to install Detector.
